

Fund Overview

The objective of Madison Balanced Fund is to achieve medium term capital growth while realizing regular income over time. The Fund will invest in a diversified portfolio of various asset classes in the local and international market to balance the portfolio risk. Nonetheless, the fund may adopt a tactical strategy from time to time and is expected to give the overall portfolio stability and a consistent income stream.

Fund Performance

Fund Manager

Madison Investment Managers was incorporated in 2001; the company has been actively involved in Investment Management, providing quality fund management and investment advisory to corporate entities and Individuals.

Investment Approach

The fund employs a top-down investment approach that starts with establishment of strategic asset class allocation based on the investment outlook, which is updated quarterly or earlier.

Stock selection is done after a thorough due diligence of each of the companies that seek to provide long term value. This includes fundamental company valuation and assessing risk from a company, industry and market perspective.

Bond selection is done by assessing the overall economic environment and its likely effect on interest rates, the level and direction of rates and shape of the yield curve. Thereafter, determine the optimal allocation on the different categories of bonds.

Active Management through regular rebalancing ensures that the fund is well positioned to achieve stable returns.

Asset Allocation

Statutory Disclosure and General Terms and Conditions:

Performance data represents past performance, which is not a reliable guide to future performance. Current fund performance may differ from the figures shown. The performance is quoted gross of fees and is annualized. A schedule of fees and charges and maximum commissions is available on request from the fund manager. The value of a unit trust is volatile which means it may go down as well as up. The Fund is valued on a daily basis and the bid – ask unit prices are available in the national papers. Unit trusts are generally medium to long term investments. We advise that a potential investor is expected to consult a financial advisor before making an investment. Units are traded at the ruling prices. Unit trust values are calculated on a net asset value basis, which is the total of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio. The prices, which will apply to an instruction received on Saturday/Sunday or public holiday will be that of the following Monday/trading day. Please note that income distributions to unit holders are subject to withholding taxes. The funds are held at a custodian account and the funds activities are overseen by a custodian
